## Topic : Hotel search website

Aim:

Draw a component diagram initialize all possible input, output & internal, external components.

Objective:

Implementation of Component Diagram to initialize all possible input, output and internal, external components.

Theory:

While other UML diagrams, which describe the functionality of a system, component diagrams are used to model the components that help make those functionalities. In this component diagram tutorial, we will look at what a component diagram is, component diagram, and how to draw one.

Conclusion:

Successfully implemented component diagram using drawio website.
